

Dear McGill Architecture Students,

My name is Peter Fu and I am the CEO of KFStone Design International Inc. CANADA in Shanghai.

Having finished my Master at Tongji University in Shanghai, one of China's most famous architecture department, I decided to move to Montreal in order to explore and experience a different approach in architecture. In 1991, I received my diploma at McGill University and went on working for 9 years in Toronto before coming back to China. My stay in Canada has brought so much to me, I am deeply grateful to McGill.

We are always looking for new young minds at KFS, students with imagination and creativity who can take initiatives in design. Our design and research group is made of people from all over the world, Spain, USA, France, Canada, and Italy. The projects we work on are mainly large-scale residences and complexes everywhere in China.

I find that the education in architecture at McGill is excellent. We would be delighted to have you as an intern during the four months summer break. The internship package contains a flight ticket, an apartment, extra money for personal use and an everyday lunch.

Shanghai is an amazing city to start your career as professional architects; there are so many working opportunities, places to visit and people to meet. China will hopefully bring as much to you as McGill has brought to me!

Hope to see you very soon,

Best regards,

Peter Fu
