

Secondary Landscape Proposal
for the Restoration of the Island

Frederick G. Todd
1937
Canadian Centre for
Architecture

After the first proposal ran out of funding, it seems Todd scaled back his plans. This second proposal does not join Ile-Ste-Helene and Ile-Ronde and also scales back the number of bathing beaches on the site. Instead, Todd focuses on more general play-grounds. The programming of this landscape is still very family oriented, the children's playground and the play field play a very important role. Todd maintained the forest from the previous plan, with its ambling paths.
